# CONTENT – POLL – 2.3.0

---

## 1 NEW FEATURES

- Configuration of the start page - separation of picture and headline
- 

## 2 IMPROVEMENTS

- Display of poll results for long answer texts
  - New language support: Finnish
- 

## 3 BUGFIXES

- Incorrect display of the percentage on evaluations with small response bars
  - Entering spaces in free text answers was considered participation
-

01

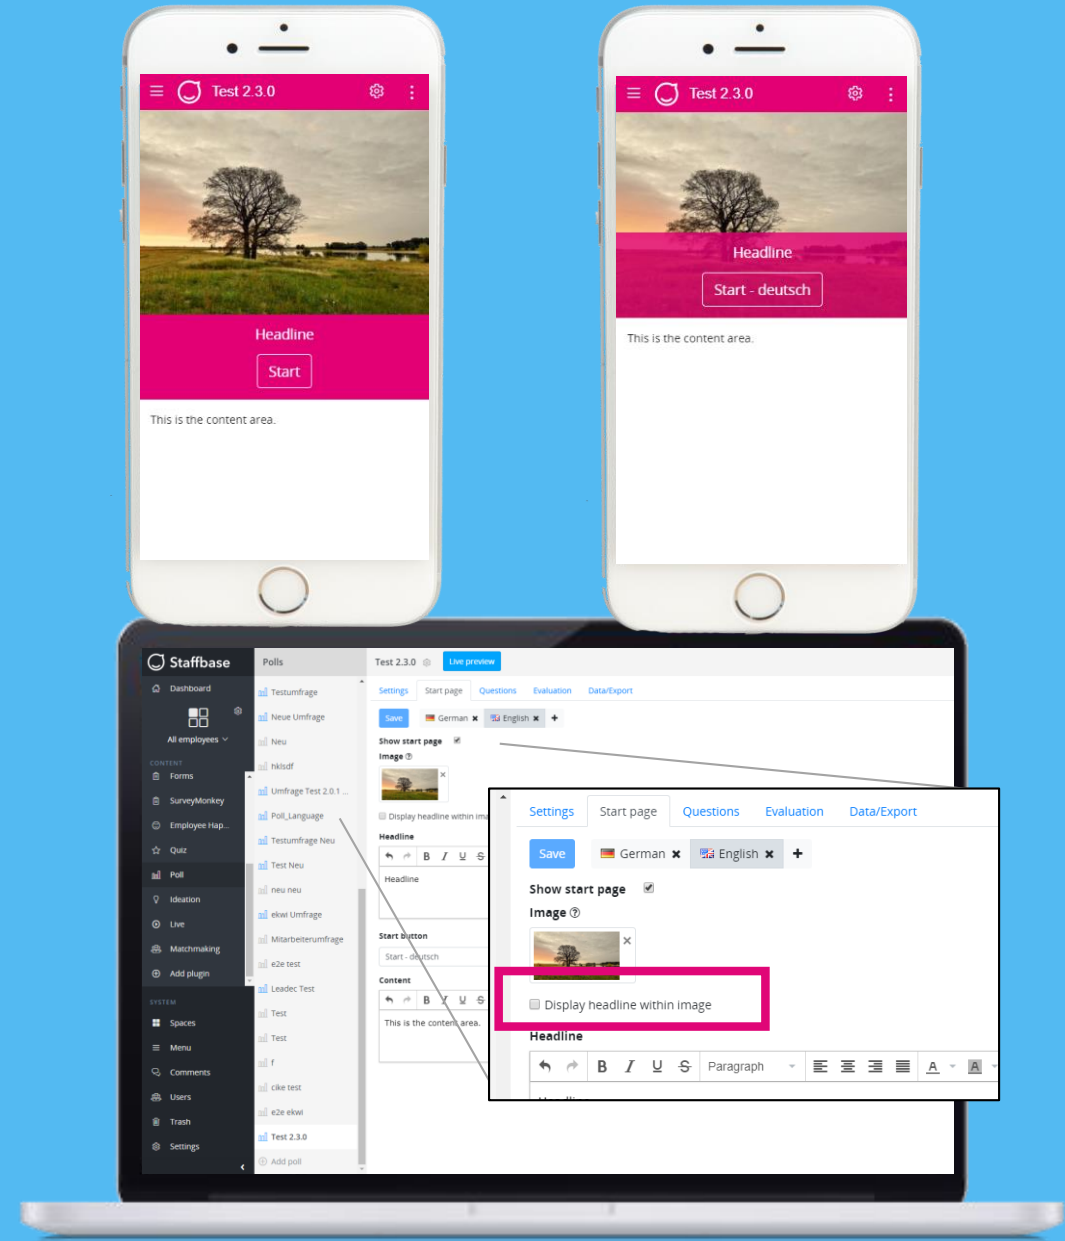

**NEW FEATURES**

# Configuration of the start page – separating of picture and headline

We have often received feedback that when using images for the start page, the headline part overlays the image too much.

We have therefore integrated a new configuration option when using images for the start page. The editor can now decide for the start page whether the heading part should be displayed in the image or below the image.

Note: The configuration option is only visible when an image is used.

02

**IMPROVEMENTS**

# IMPROVEMENTS

## Display of poll results for long answer texts

Long answer texts in the evaluation pages meant that the evaluation was not presented in a readable form for the relevant questions. We have corrected this by cutting off the answer text for the evaluation page.

## New language support: Finnish

The standard navigation elements are now available in Finnish.

03

**BUGFIXES**

# BUGFIXES

## **Incorrect display of the percentage on evaluations with small response bars**

On evaluation pages, the percentage was not visible if the bars were too small. This is now fixed!

## **Entering spaces in free text answers was considered participation**

For free text answers, the entry of "space" was considered participation. This is now fixed! Simply entering spaces does not count as participation.
