

EMPLOYEE EXPERIENCE PLUGINS

POLL-Plugin

Release Notes Version 2.6.0

POLL Plugin

Content Version 2.6.0

NEW FEATURES

new

- New option for text type questions to allow numeric answers only

IMPROVEMENTS

- Complete redesign, incl. changes for colors and branding options

01 NEW FEATURES

Numerical answer option

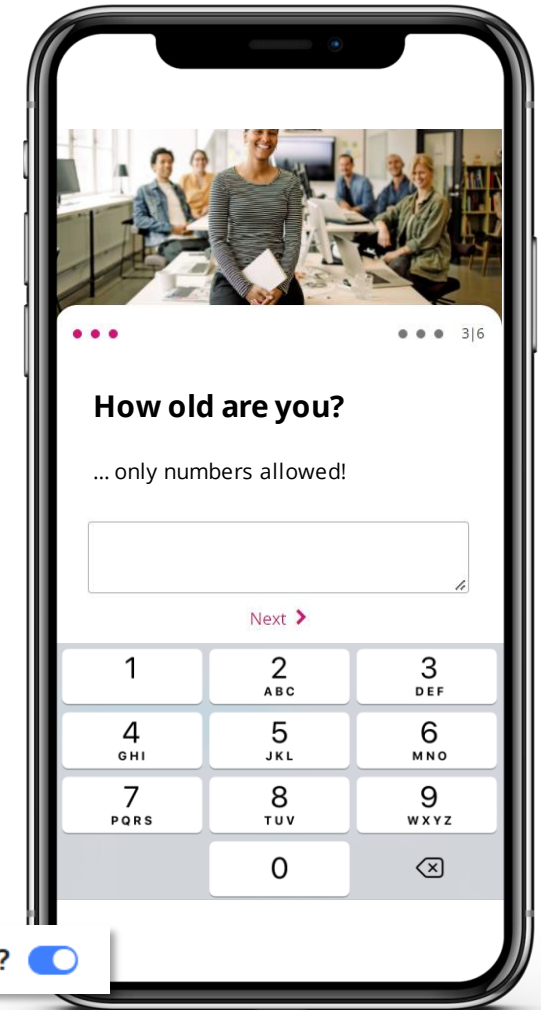

Numerical answers

Problem until now

Open-ended questions that were designed for a numerical answer could nevertheless be answered with a text. This makes it difficult to analyse. In addition, users expect similar behaviour as in privately used apps.

Improvement / New feature

In future, editors will be able to select the **field "accept numerical answers only" for open questions**. In this case, users will only be shown the number block on mobile devices in future. This will make it easier for editors to analyze the data, as it only consists of numbers.

02 IMPROVEMENTS

New modern design

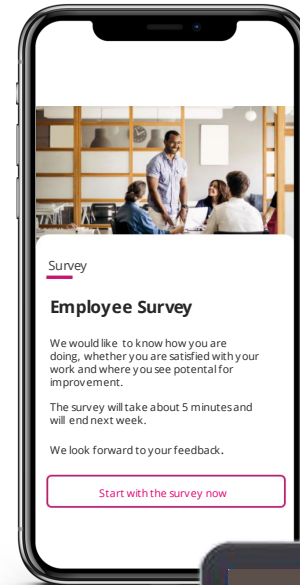

The design was in desperate need of a new look. Since the first implementation in 2018, we have not fundamentally changed the design.

With the update, the **poll shines in a completely new fresh design**, which is designed differently for the plugin on the desktop as well as on mobile.

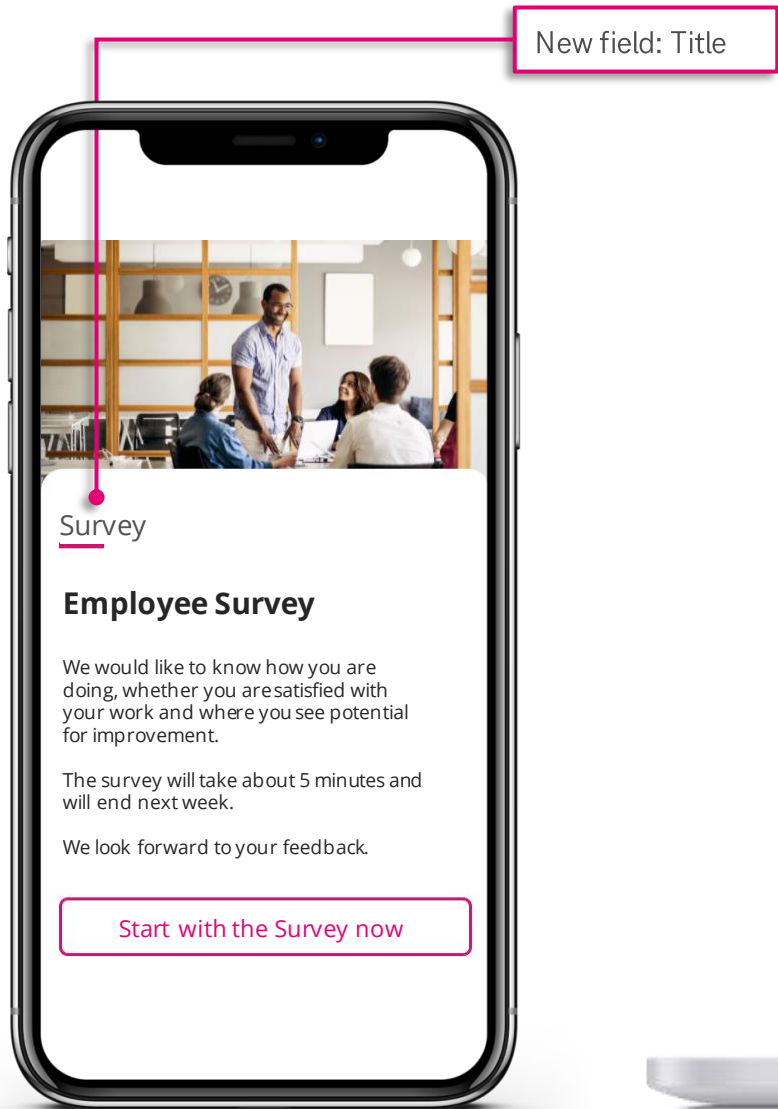

All pages such as the start page, question pages and evaluation pages are now much more modern. This makes surveys even more fun!

With the new design also comes **small functional changes**:

- New field *Title* for start page
- Complexity reduction regarding colors: The editor can now define only one highlight color.
- Possibility of an image now also for the evaluation page
- General possibility to define a background color when using images on the desktop

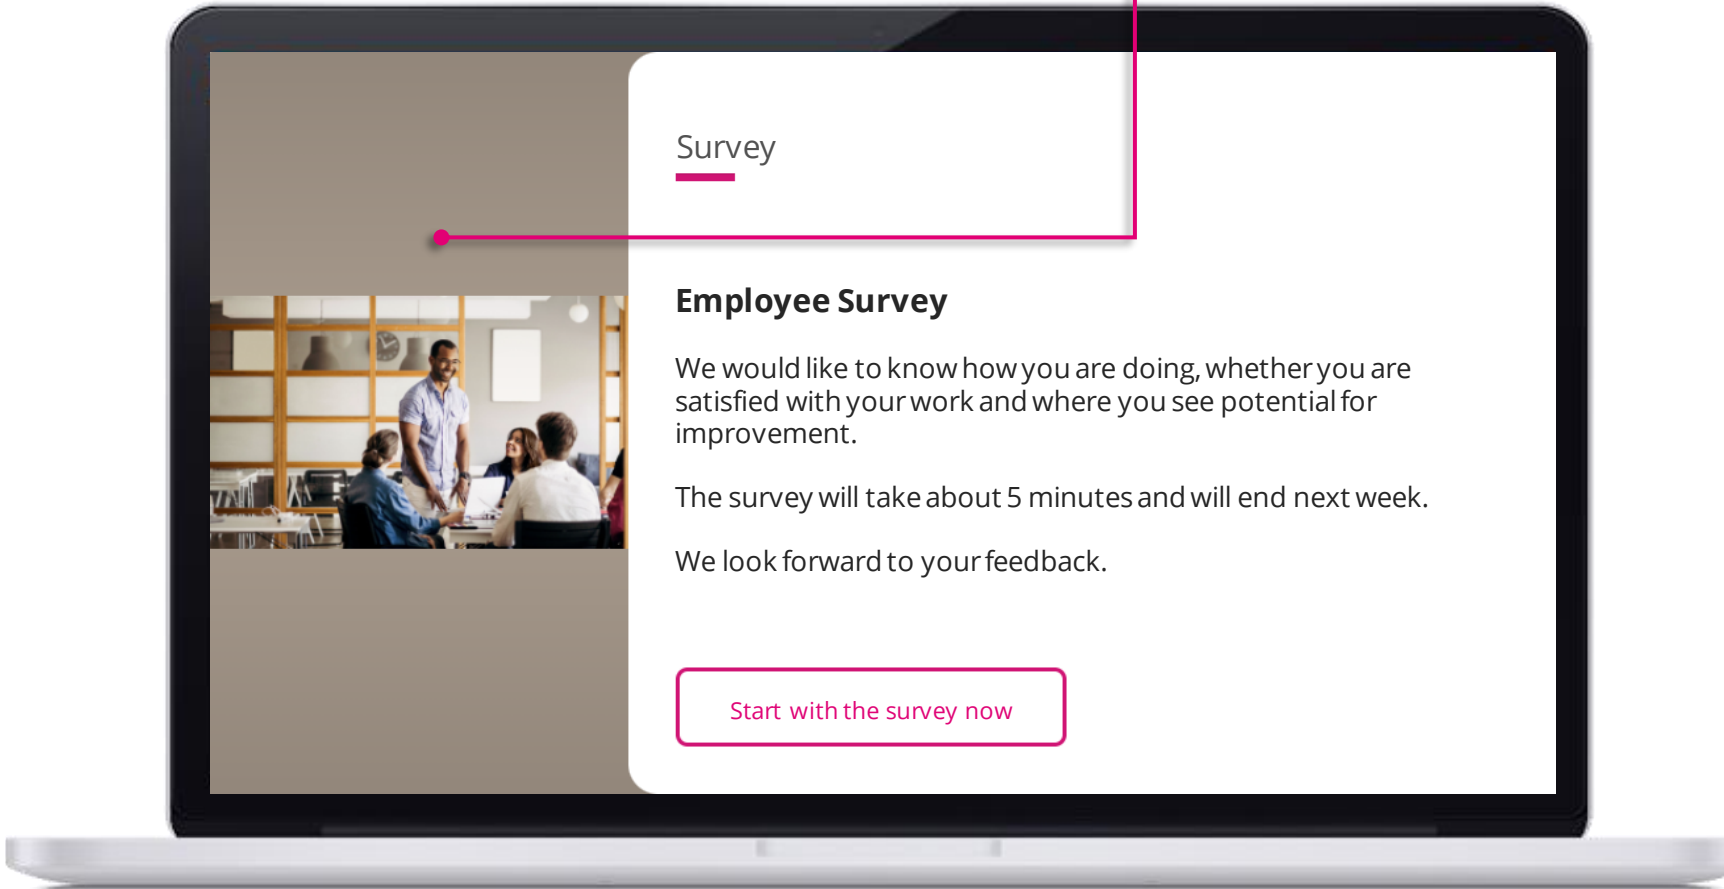

New Design - Homepage

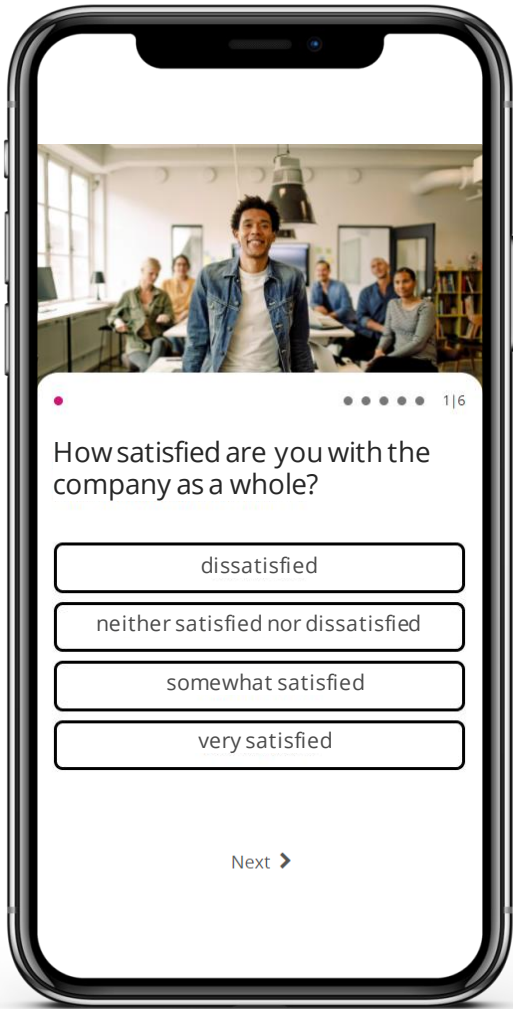

Different layout separated for mobile and desktop

Background color for image on desktop

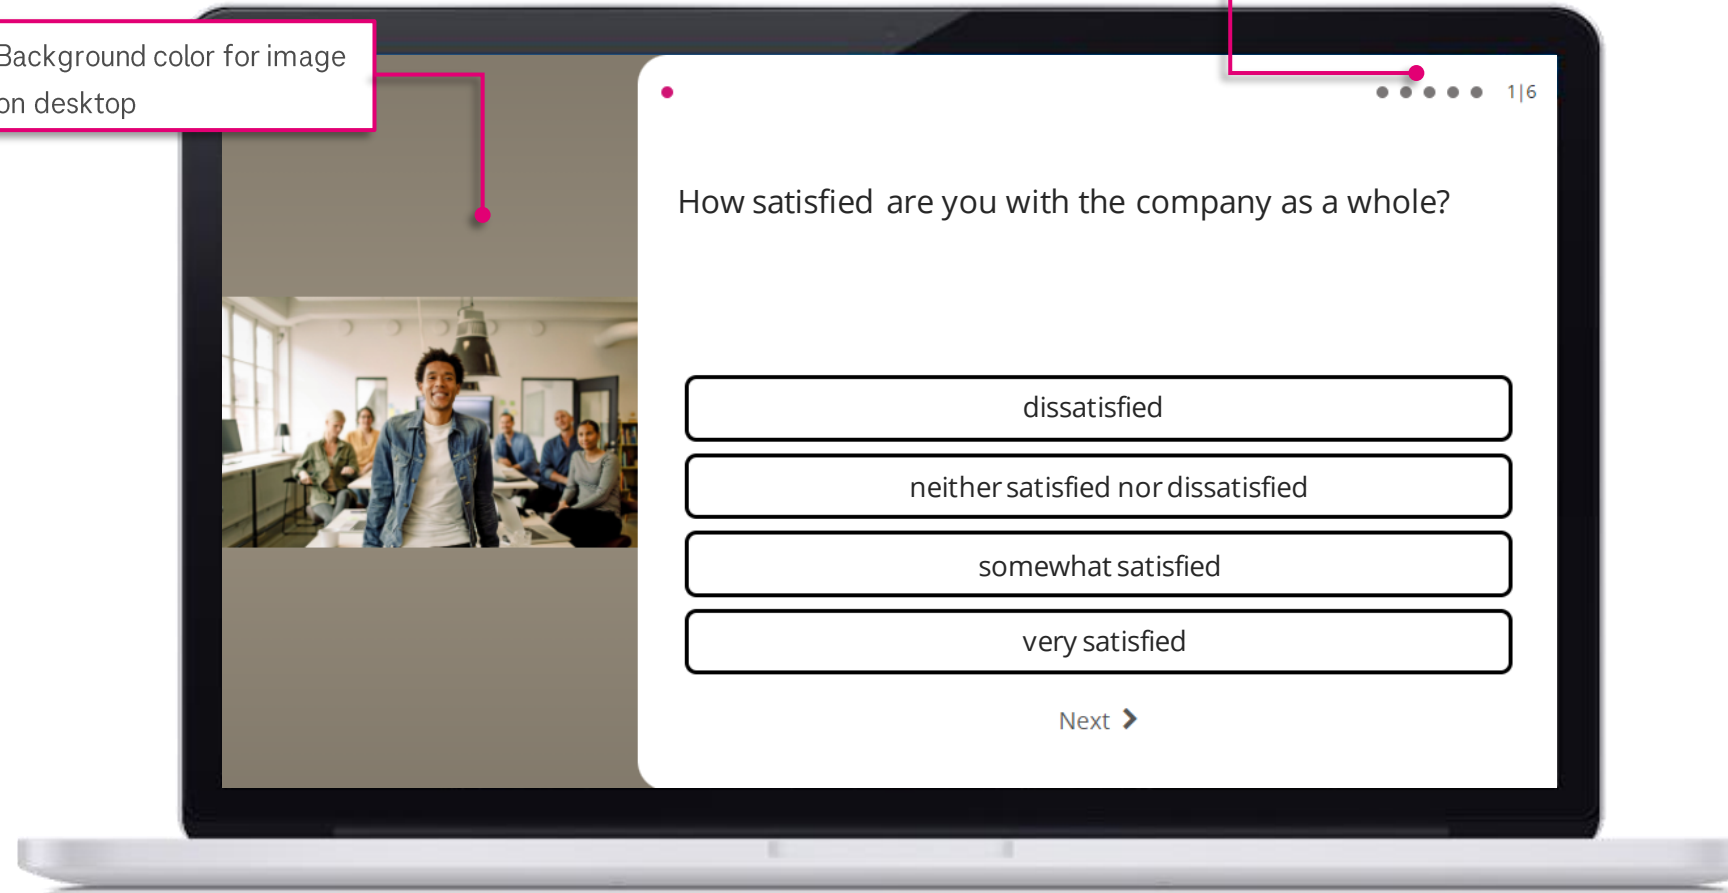

New Design – Question of type „Button“

Different layout separated for mobile and desktop

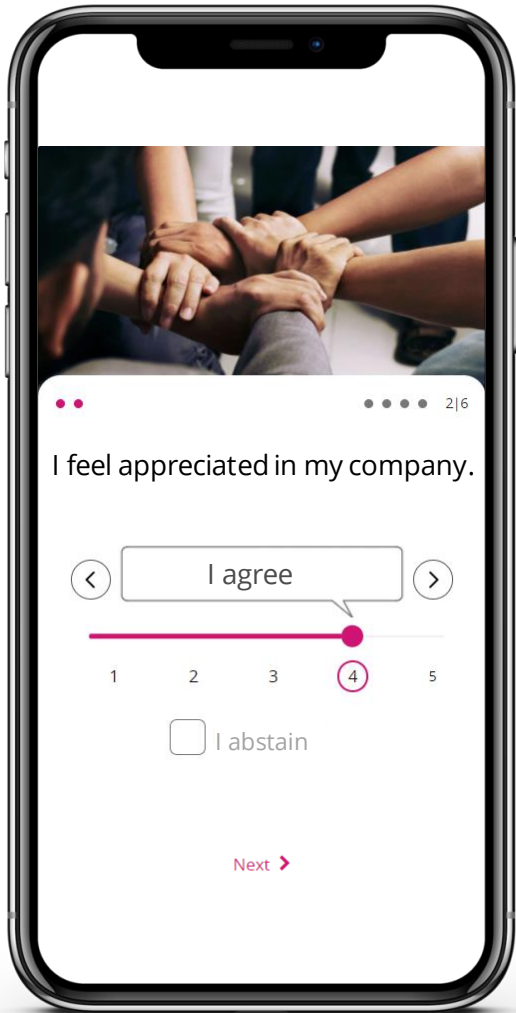

Progress bar in new design

Background color for image on desktop

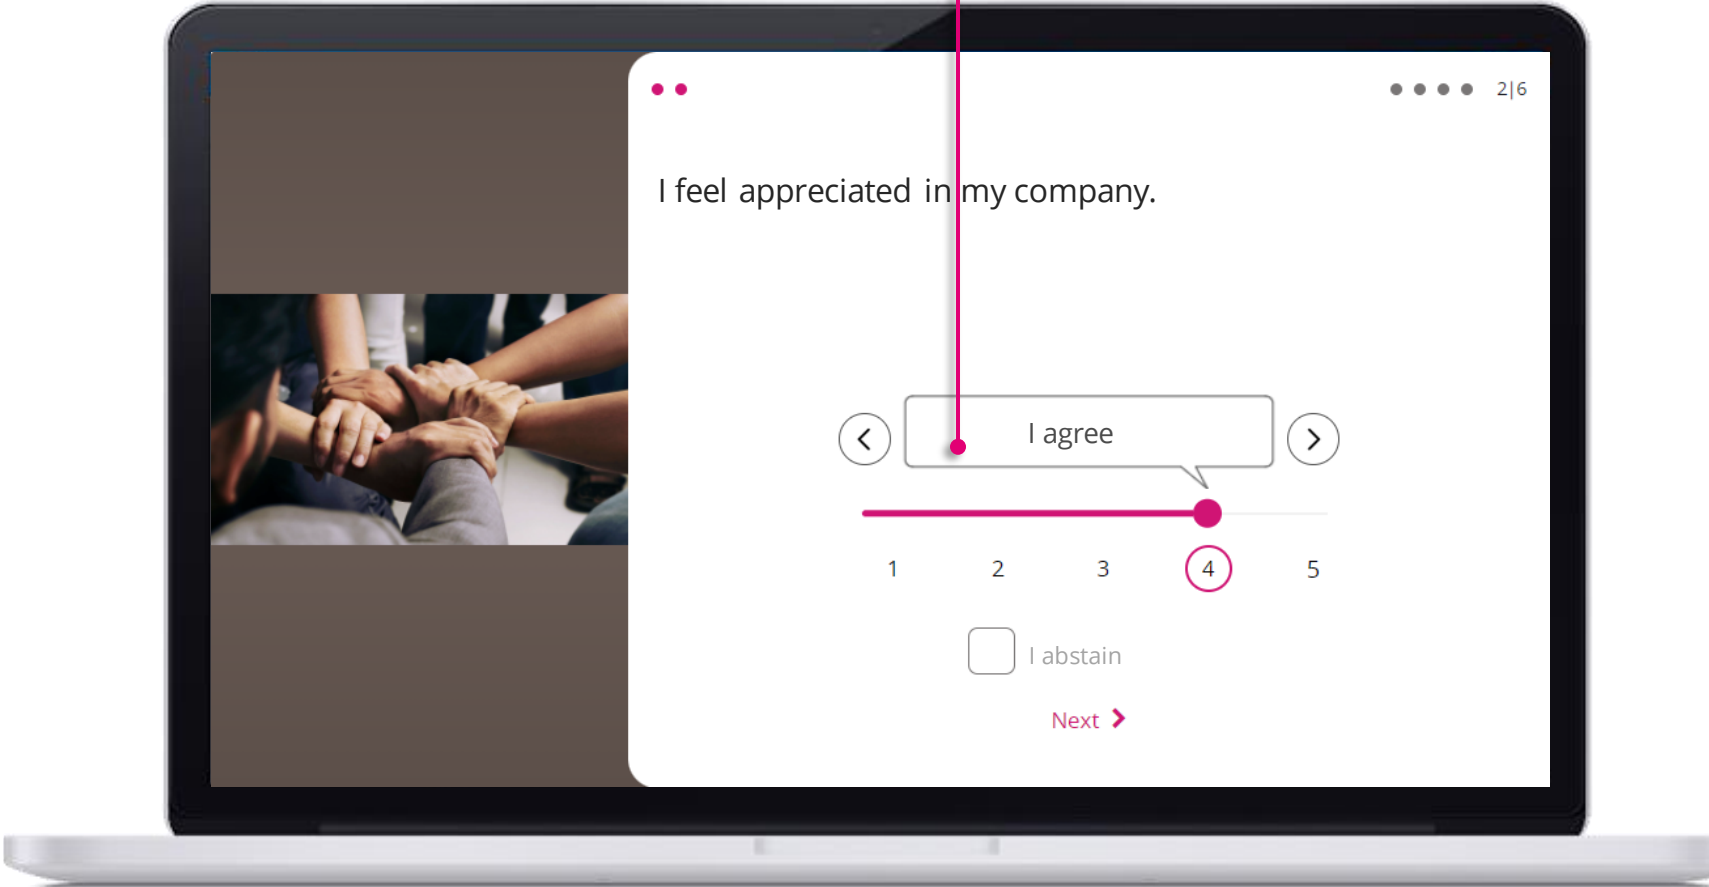

New Design – Question of type „Slider“

Different layout separated for mobile and desktop

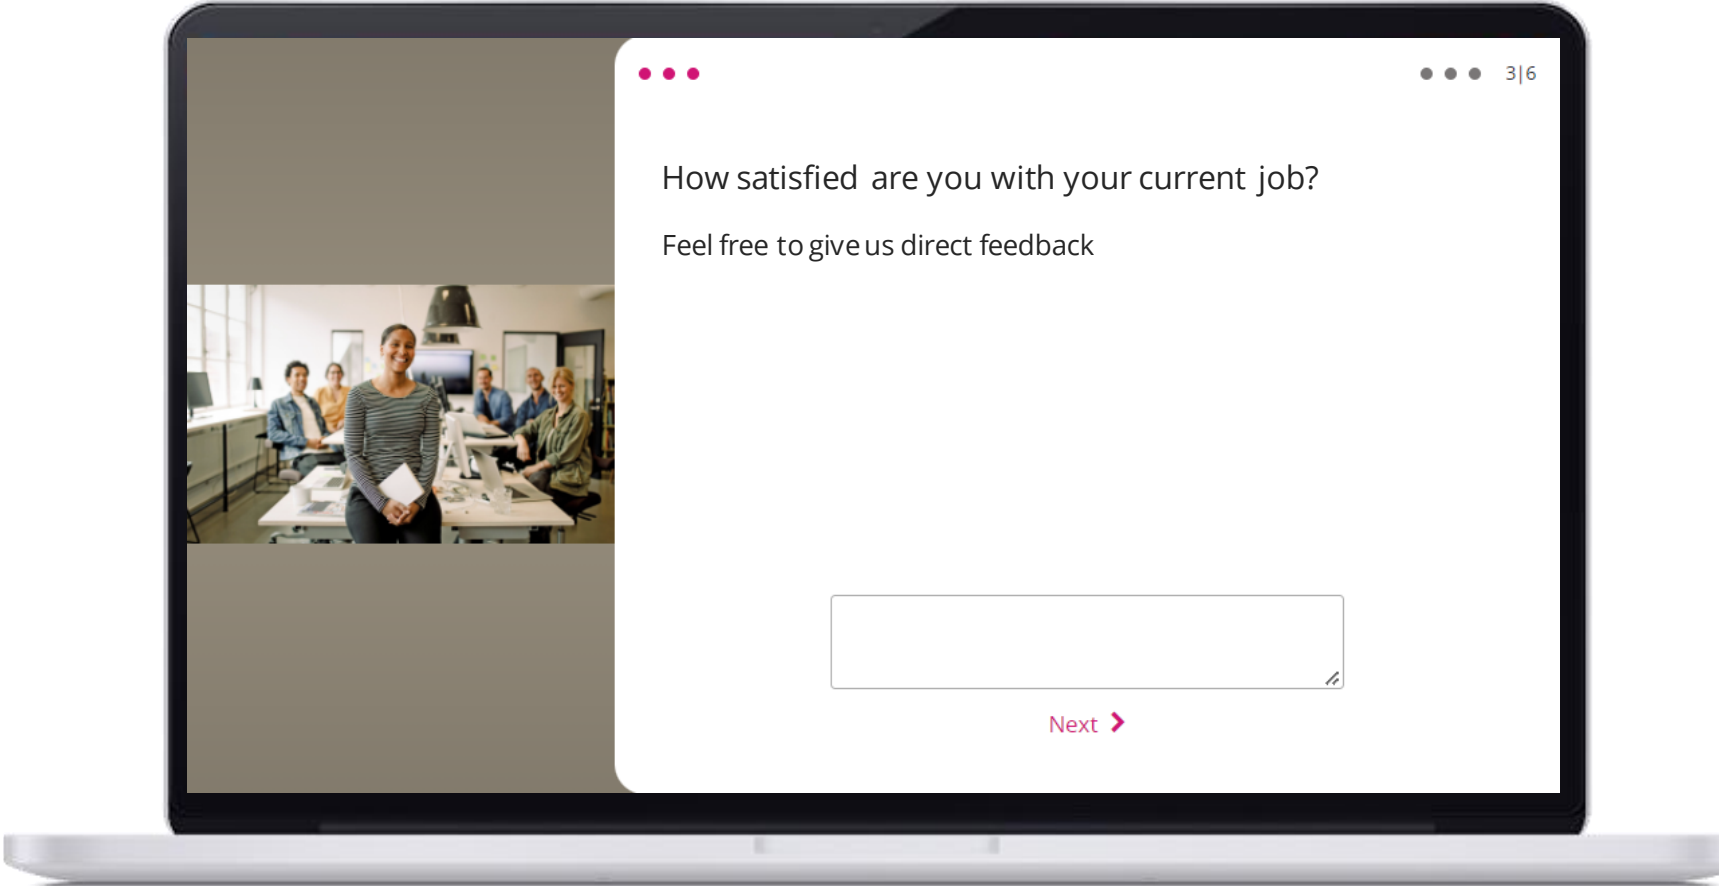

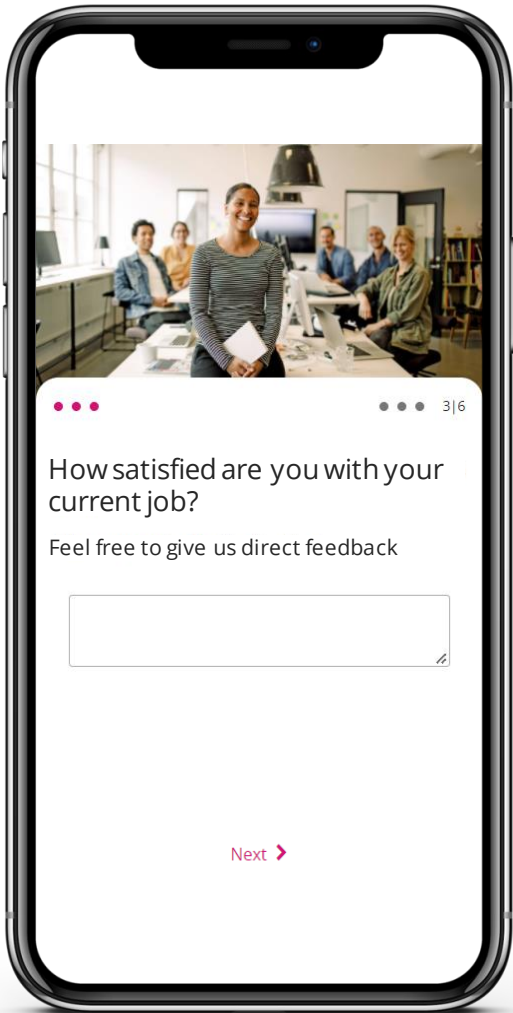

New slider layout: Accessible via arrows, click on the numbers or sliding on touch devices
