

EMPLOYEE EXPERIENCE PLUGINS

## QUIZ-Plugin

# Release Notes Version 2.3.5

# QUIZ Plugin ★

## Content Version 2.3.5

### IMPROVEMENTS

- Server-side export
- Czech translation
- Improvements for accessibility

## Server-side export

### Problem until now

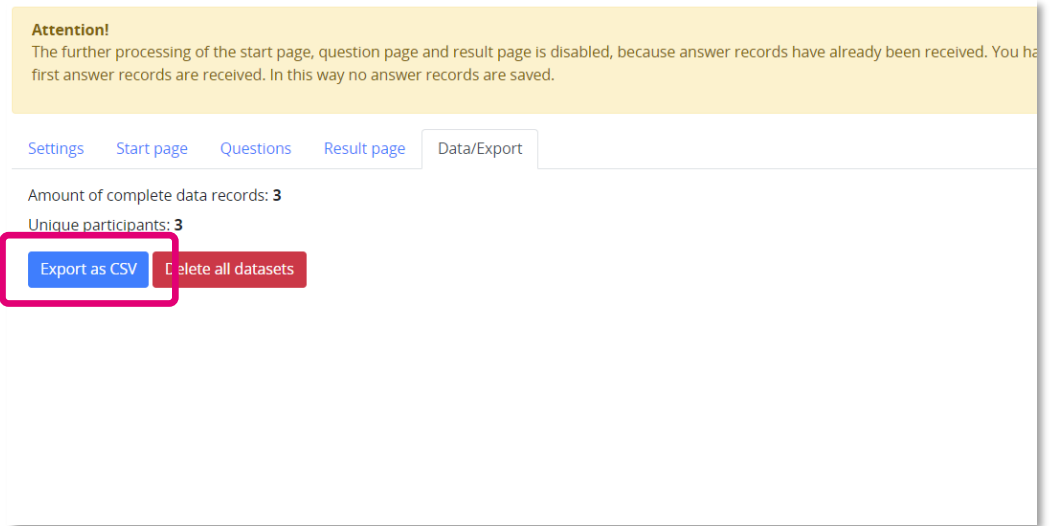

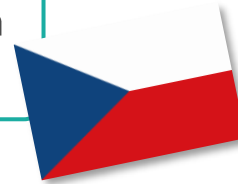

Since the export of poll results used to take place in the browser of the poll editor, there were often performance problems which led to browser crashes.

### Improvement

The export is now generated on the server side and thus no longer affects the performance of the browser. Exporting large amounts of data in particular is therefore less sensitive to errors.

## Czech translation

For users who use the employee app in Czech, the standard texts of the poll plug-in are now also automatically displayed in Czech.

**Attention!**  
The further processing of the start page, question page and result page is disabled, because answer records have already been received. You have already received the first answer records. In this way no answer records are saved.

Settings Start page Questions Result page Data/Export

Amount of complete data records: 3  
Unique participants: 3

Export as CSV Delete all datasets

## Improvements for accessibility

Accessibility to information technology is also important for our plugins. Therefore, we have implemented some measures that simplify access to the quiz also for people with disabilities.
