Ideation Plugin.

Release Notes Version 4.5

Plugin Ideation.

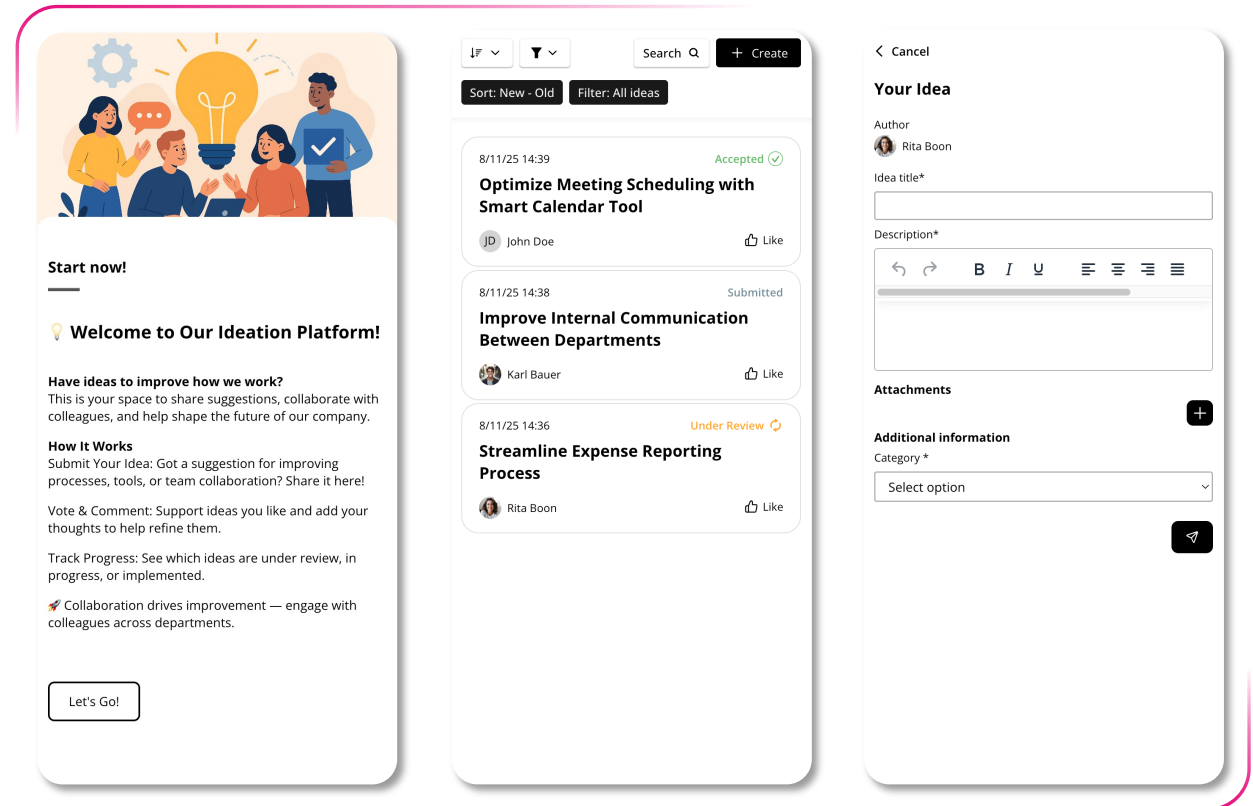

Use Cases

Transform the way your team innovates with our Ideation Plugin! This powerful tool empowers employees to submit, comment on, and vote for ideas — all while providing the flexibility and control your organization needs.

Whether you're managing innovation, gathering feedback, organizing tasks, or even running an internal marketplace where employees can propose and exchange services or resources, our Ideation Plugin makes it easy to harness the full potential of your team.

Features

- **Customizable Templates:** Boost participation with flexible, predefined or custom fields — including the option for anonymous submissions.
- **Collaboration Tools:** Drive teamwork and innovation by commenting, sharing, and voting on ideas..
- **Configurable Status System:** Easily track idea progress (e.g., open, in progress, implemented) and control functionality based on status.
- **Automatic Notifications:** Keep everyone in the loop with real-time (push) notifications for status updates and new submissions.
- **CSV-Export:** Gain deeper insights by exporting detailed data for analysis and optimization.
- **Task management:** Use the plugin for simple tasks too - with a date field for tracking deadlines and optional editing by all users for collaborative work.

Release Notes – Ideation 4.5 - Overview.

NEW FEATURES

- Subscribe to ideas
- Comment function for editors
- Enhanced Sharing Option

BUG FIXES

- Comment access for editors

01

New Features.

Subscribing to ideas.

Subscribe to ideas ("Follow") + Auto-Follow + Filter option.

With the new "Follow" feature, users can **subscribe to specific ideas** and, once activated, receive automatic notifications about relevant updates, such as new comments or status changes.

Changes for editors:

Editors can **activate or deactivate** the follow feature centrally, but can **no longer configure it individually for specific use cases**. This simplifies administration and ensures consistent user behaviour.

Auto-follow when function is activated:

- **Idea authors** automatically follow their own ideas.
- **Comment authors** automatically follow the idea they have commented on.

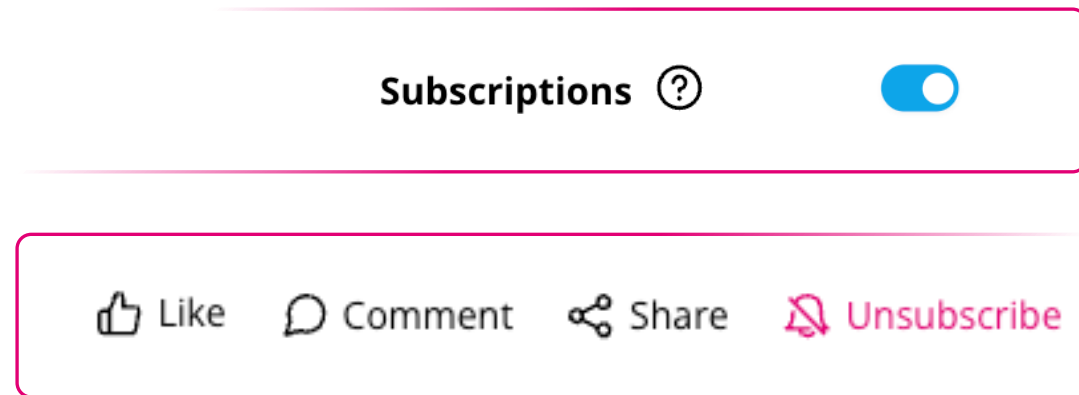

New filter function for users:

An additional filter allows users to **filter their subscribed ideas in a targeted manner** – for a quick overview of the content they are actively following.

Benefits:

- Encourages continuous participation in relevant ideas
- Reduces configuration effort for editors
- Delivers rapid added value through simple activation and targeted filtering

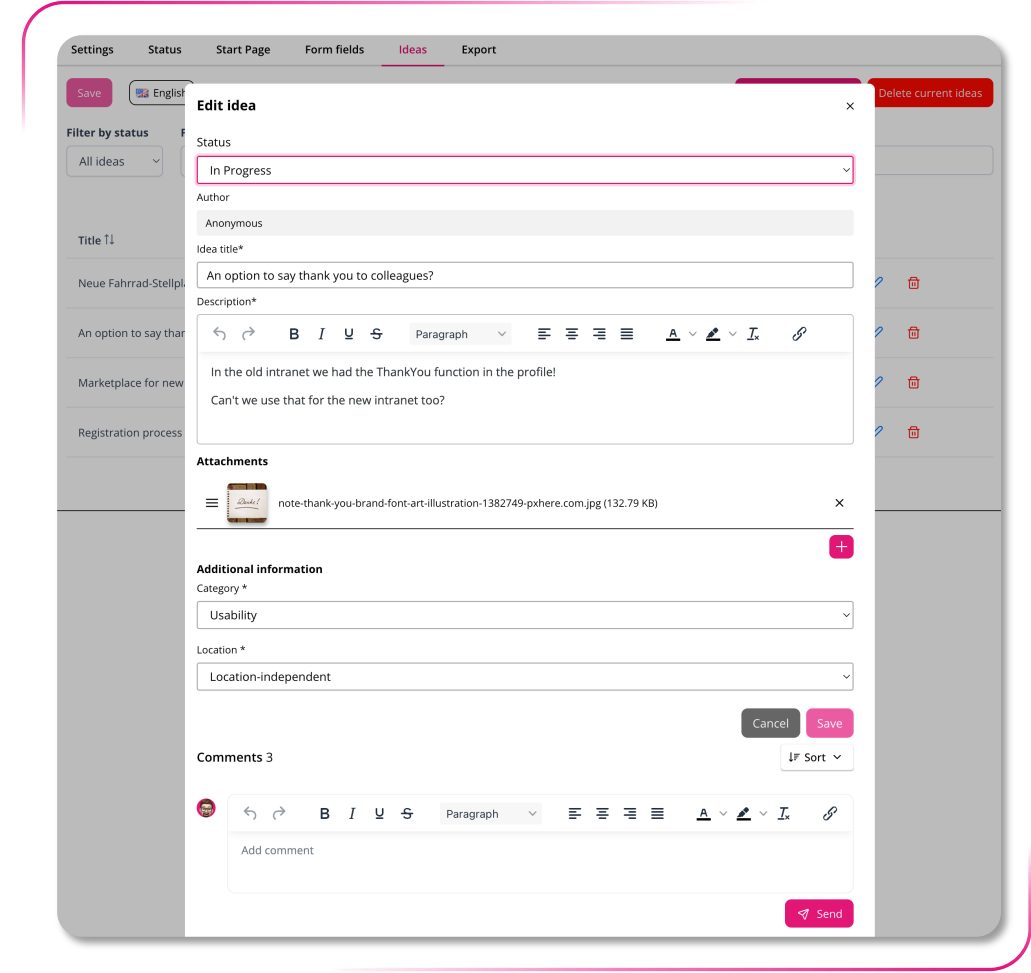

Comment function for editors.

Editors can now write and view comments on ideas directly in the back office – without having to access the front end. This enables the complete management and discussion of ideas even in scenarios where visibility in the front end is restricted to authors.

Benefits:

- **Full collaboration:** Editors can comment on and edit ideas directly in the backend
- **New use cases:** Ideal for internal ticketing and workflow processes
- **Independence from the front end:** Work efficiently even with limited visibility
- **Centralised editing:** Review, discussion and follow-up in one place
- **Enhanced flexibility:** Makes the plugin versatile beyond classic idea collection

Enhanced Sharing Option.

The new, dynamic "Share" button makes sharing ideas much easier. Internal and enhanced sharing are now combined in a single button that automatically adapts to the device and configuration.

Details:

- Editors can activate/deactivate enhanced sharing in the configuration.
- On mobile devices, the native share dialogue is used.
- On desktops, a copyable link* appears or the option to share the idea within the platform.

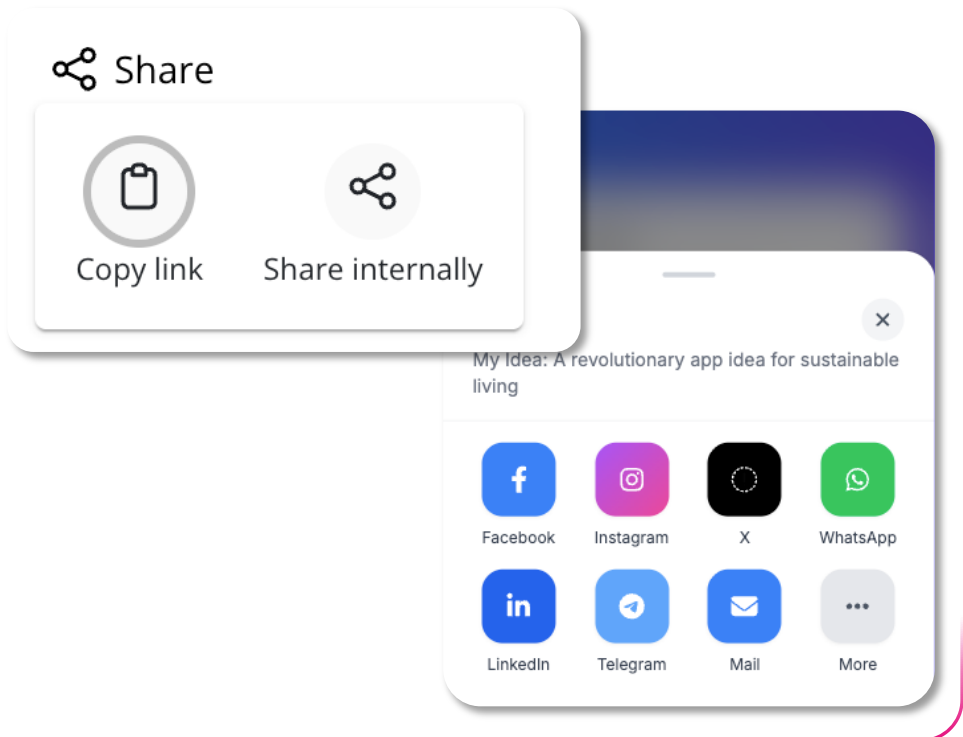

Benefits:

- Consistent user experience for all sharing options
- Greater reach through easy sharing
- Full control over external visibility
- Higher participation through easy invitations to discussions

*The link copying feature is not yet supported on all platforms. Please contact us at ees-support@telekom.de if you have any questions.

Enhanced Sharing Option  

A stylized pink geometric graphic composed of several overlapping squares and rectangles. The number '02' is written in white inside one of the central squares.

02

Bug Fixes.

Bug fixes.

Comment access for editors.

Editors can now easily comment even with restricted status visibility. The authorisation check (`canViewIdea`) is no longer applied in the back office, which prevents errors when commenting and changing statuses.
