Ideation Plugin

Release Notes 4.6

Plugin Ideation.

🔍 Use Cases

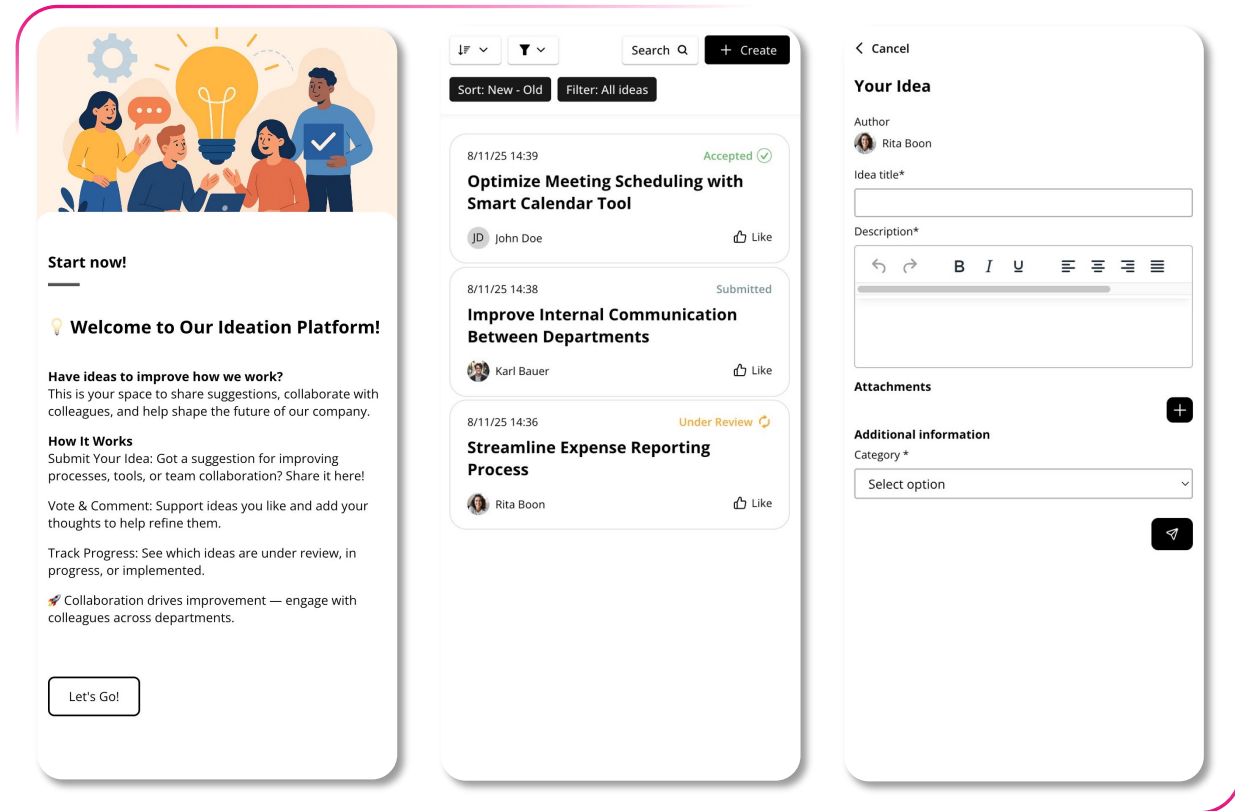

Transform the way your team innovates with our Ideation Plugin! This powerful tool empowers employees to submit, comment on, and vote for ideas – all while providing the flexibility and control your organization needs.

Whether you're managing innovation, gathering feedback, organizing tasks, or even running an internal marketplace where employees can propose and exchange services or resources, our Ideation Plugin makes it easy to harness the full potential of your team.

Features

- **Customizable templates:** Boost participation with flexible, predefined or custom fields – including the option for anonymous submissions.
- **Collaboration tools:** Drive teamwork and innovation by commenting, sharing, and voting on ideas.
- **Configurable status system:** Easily track idea progress (e.g., open, in progress, implemented) and control functionality based on status.
- **Automatic notifications:** Keep everyone in the loop with real-time (push) notifications for status updates and new submissions.
- **CSV export:** Gain deeper insights by exporting detailed data for analysis and optimization.
- **Task management:** Use the plugin for simple tasks too - with a date field for tracking deadlines and optional editing by all users for collaborative work.

Ideation 4.6 – Overview.

NEW FEATURES

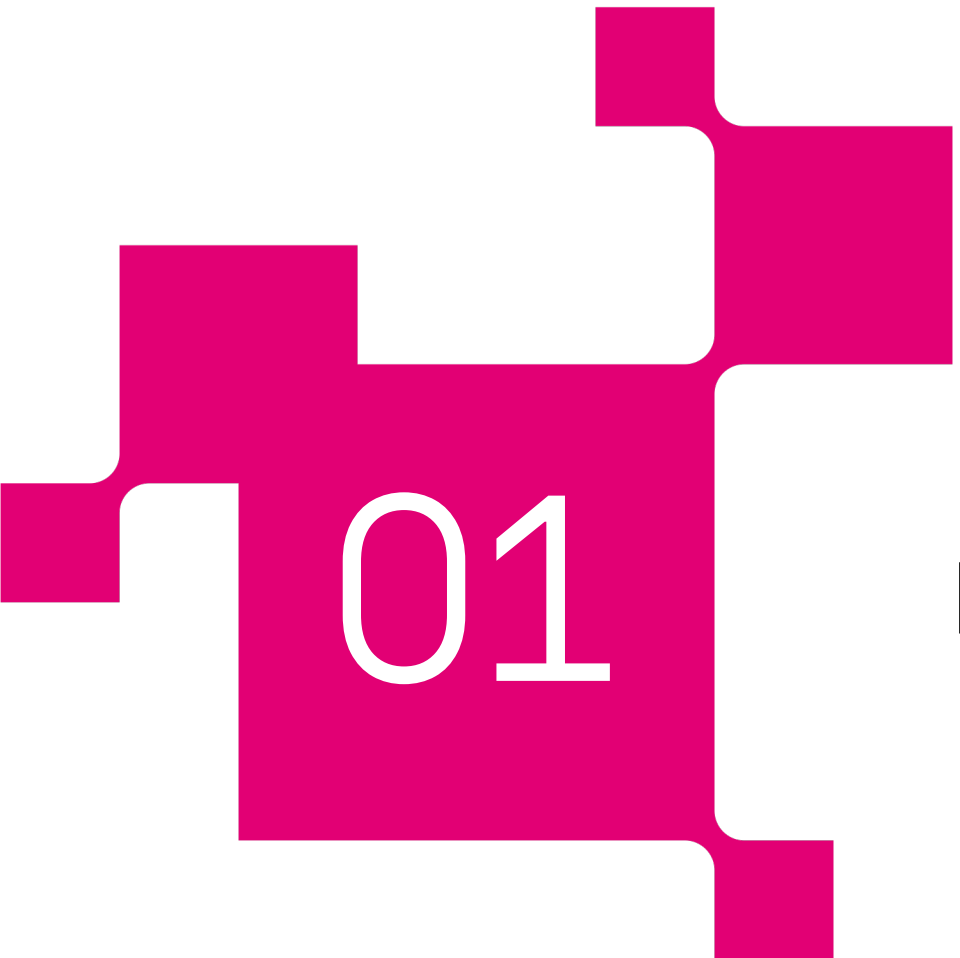

- @Mentions for ideas & comments.
- CSV export now includes optional profile fields.

IMPROVEMENTS

- Improved performance on the idea details page thanks to pagination.

BUG FIXES

- Content from customised form fields is now included in full in the ideas export.

01

New Features.

@Mentions for ideas & comments.

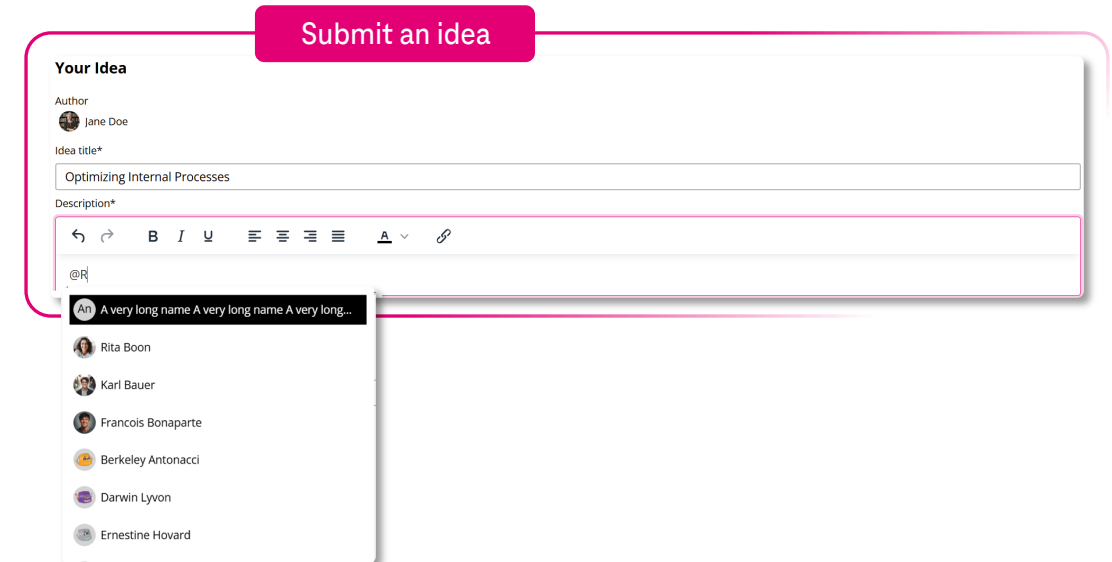

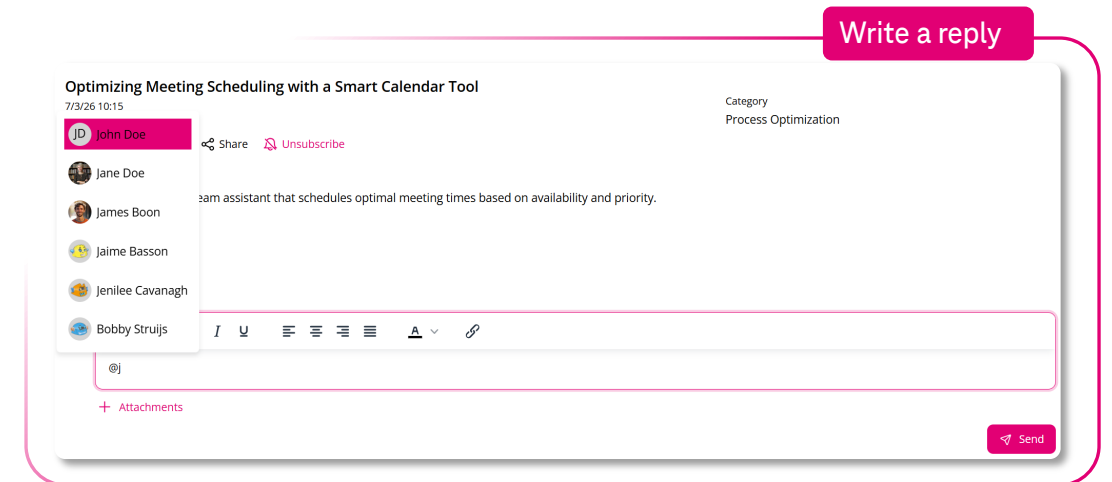

Users can now tag other people directly in comments and idea descriptions using the @ mention feature. When you type “@”, a user picker opens, making it easy to search for and select users.

💡 Benefits:

- **Targeted communication:** Users can be addressed directly and involved in discussions.
- **Greater transparency:** Mentioned users are clearly highlighted in the text.
- **Quick response:** Mentioned users receive a notification including a direct link to the relevant idea.
- **Improved navigation:** Users can jump directly to the relevant comment, which is automatically highlighted.
- **Intuitive use:** Familiar @-mention logic for simple and seamless use.

Note

- ❗ @-mentions are fully supported on compatible platforms. Availability depends on the technical capabilities of the respective platform.

CSV export now includes optional profile fields.

When exporting to CSV, selected profile fields of idea submitters can now also be included. Alternatively, the export can be generated without personal profile information. This allows ideas to be analysed in a more targeted manner and combined with relevant organisational data.

Benefits:

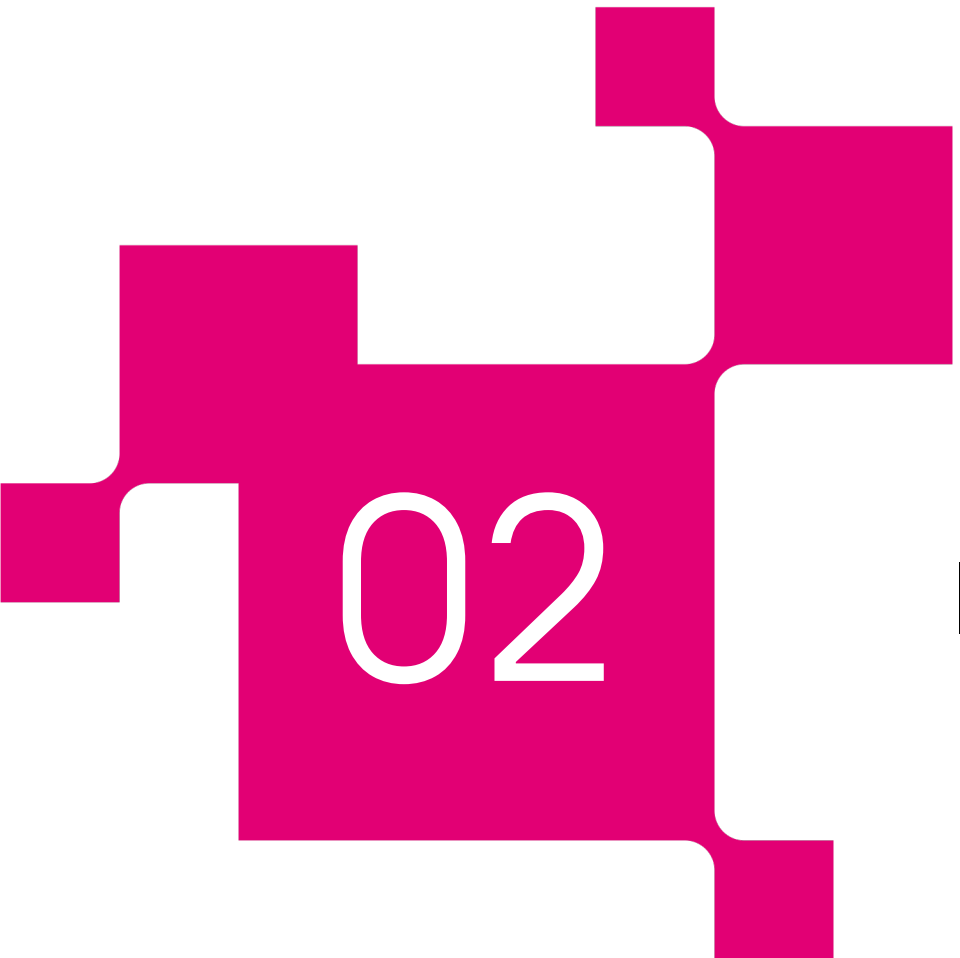

- **Advanced analyses:** Ideas can be combined with selected profile information from the people who submitted them.
- **Flexible selection:** You can specify exactly which profile fields are included in the export.
- **Privacy-friendly export:** Profile information can be excluded entirely if required.
- **Improved segmentation:** Analyses by department, location or organisational unit are now possible.
- **Further processing:** The exported data can be used in BI tools, presentations or further analyses.

The screenshot shows the 'Export' tab in the Ideation Plugin settings. At the top, there are navigation tabs: Settings, Status, Start Page, Form fields, Ideas, and Export (which is active). Below the tabs, there are three buttons: 'Export as CSV' (pink), 'Anonymous export as CSV' (pink), and 'Delete all ideas' (red). To the right of these buttons is a language selector showing 'English'. Below the buttons, there are two main sections for selecting profile fields:

- ☐ **Select all profile fields**
- ☒ **Select individual profile fields**
Select the profile fields to be included in the export. If selected, the enhanced export will include the checked profile fields for each author of an idea.

Under the 'Select individual profile fields' section, there is a list of fields with checkboxes and their corresponding values:

- ☒ **id** *janeDoe*
- ☒ **name** *Jane Doe*
- ☐ **type** *user*
- ☐ **avatar** *https://eepm-test.azurewebsites.net/assets/user/emulator/janeDoe.png*
- ☐ **groups** *admins*
- ☐ **phone** *+1-335-486-1336*
- ☐ **email** *jane-doe@nowhere.never*
- ☐ **custom:location** *Dresden*
- ☐ **custom:system_manager** *karlBauer*

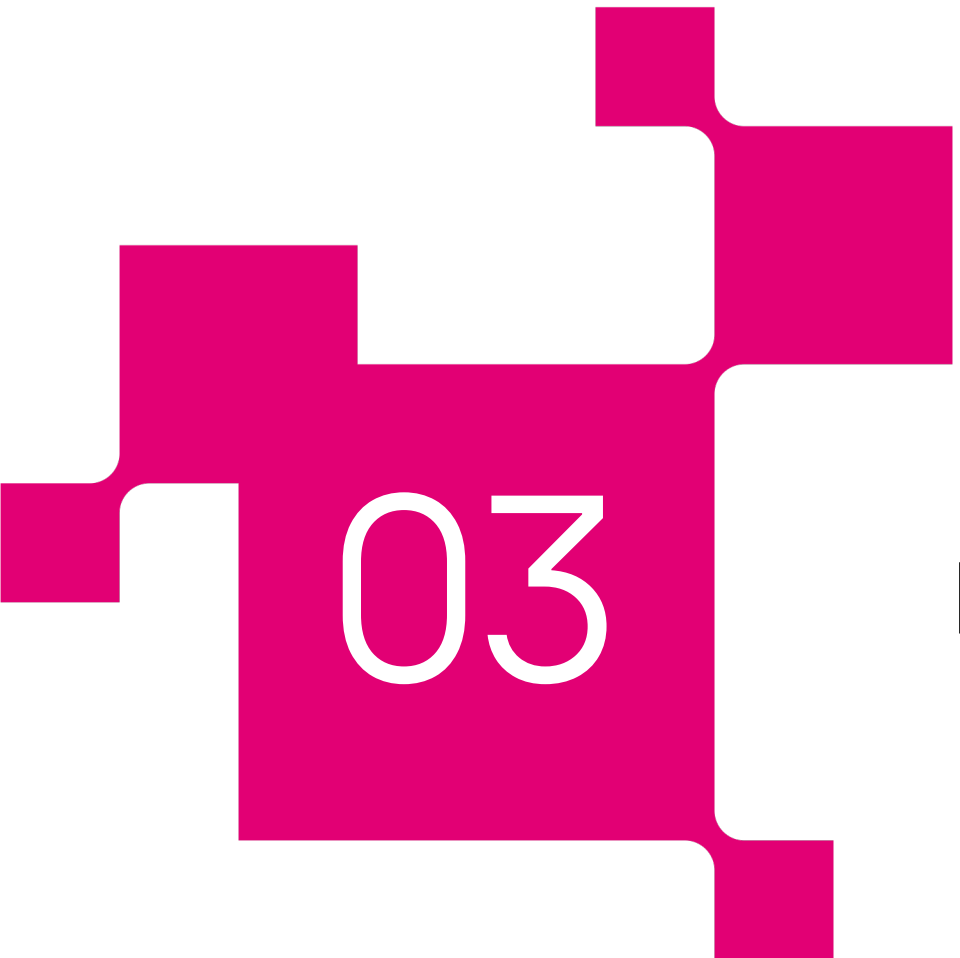

02

Improvements.

Improvements.

Improved performance on the idea details page thanks to pagination.

Comments and replies are now loaded incrementally. This allows ideas with extensive discussions to open faster and remain responsive even with a large number of contributions.

A stylized pink geometric shape, resembling a cross or a square with rounded corners and protruding sides, containing the white number 03.

03

Bug Fixes.

Bug Fixes.

Complete export of ideas.

Content from custom form fields is now fully included in the ideas export.
