Employee Experience Solutions.

# Poll Plugin.

**Release Notes Version 3.2**

# Plugin Poll.

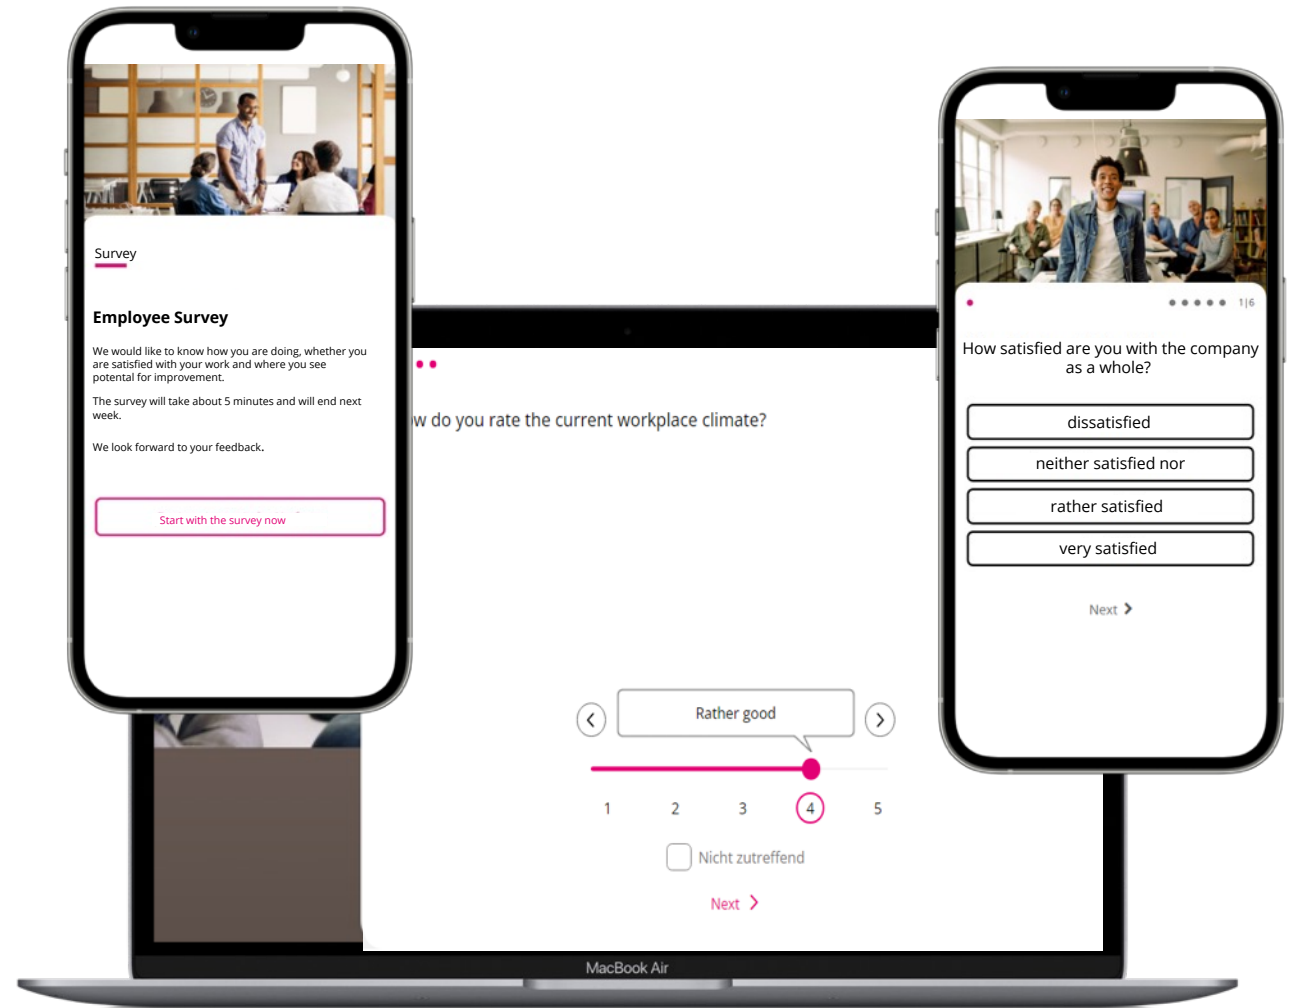

## Use case

Employee opinions and feedback are the be-all and end-all for a company - this is the only way to drive change and improvement. From **large employee surveys to quick pulse surveys** - quickly implemented thanks to the poll plugin.

## Features

- Eight question types: free text, number, button, slider, single selection, multiple choice, ranking, rating incl. option to abstain
- Anonymous and one-time participation on request
- Real-time results at the end of the survey
- Comprehensive CSV export for optimal evaluation
- Optimized for desktop and mobile use
- Use of templates
- Option for individual planning and activation of a poll with start and end date

**Technologies:**  Hailo  Staffbase

# Release Notes – Poll 3.2 - Overview.

## NEW FEATURES

- Restrict poll availability
- More information for editors: The plugin footer

## IMPROVEMENTS

- Editing of generic content also possible in live mode

01

**NEW FEATURES.**

# Restrict poll availability.

Until now, polls could not be published on a time-controlled basis.

With the new release, we have now introduced the option to define a specific start and/or end time to restrict the availability of a poll.

If active, users will not be able to access the poll content outside of the defined times.

Editors also have the option of configuring specific information texts for the new function.

*Note: As an editor, you can of course access the content of the poll at any time in edit or test mode.*

### Poll Not Yet Available

The poll you are trying to access is not yet available. Please check back later to participate. Thank you for your patience.

Available from	<input type="text" value="MM/DD/YYYY HH:MM"/>

# More information for editors.

## Plugin Footer.

With this release, a footer will be implemented in the editor user interface. This footer is permanently positioned on all tabs in the editor menu at the bottom of each tab.

With this feature, we give editors more information on how they can contact us by e-mail if they need support.

We have also made the relevant instructions for using the poll plugin available for download.

The screenshot displays the editor interface with a new footer at the bottom. The footer contains a green 'new' badge, the text 'Poll-Plugin • Version: 3.2.1 • Errors / Suggestions / Help • Manual', and 'Employee Experience Solutions powered by Deutsche Telekom MMS GmbH'. A red arrow points from the footer to a 'PDF' button with a red Adobe logo icon, which is located on a pink overlay. The overlay also features the Telekom MMS logo, the text 'Telekom MMS Employee Experience Solutions.', 'Poll Plugin.', 'Editors Guide.', and a bar chart icon. The editor interface includes fields for 'Title' (Survey) and 'Headline', a rich text editor with a toolbar, and a 'Content' area.

02

**IMPROVEMENTS.**

# Improvements.

## **Editing generic content in live mode.**

Previously, it was not possible to edit content that had no influence on the outcome of a survey once the survey had gone live. For example, it was no longer possible to add or change questions. Other content such as the start page could also no longer be edited.

With version 3.2, it is now possible to **customize the content of the start and feedback pages in live mode.**

# Questions?

Our team will be happy to help you!
