Employee Experience Solutions.

Poll Plugin.

Release Notes Version 3.3

Plugin Poll.

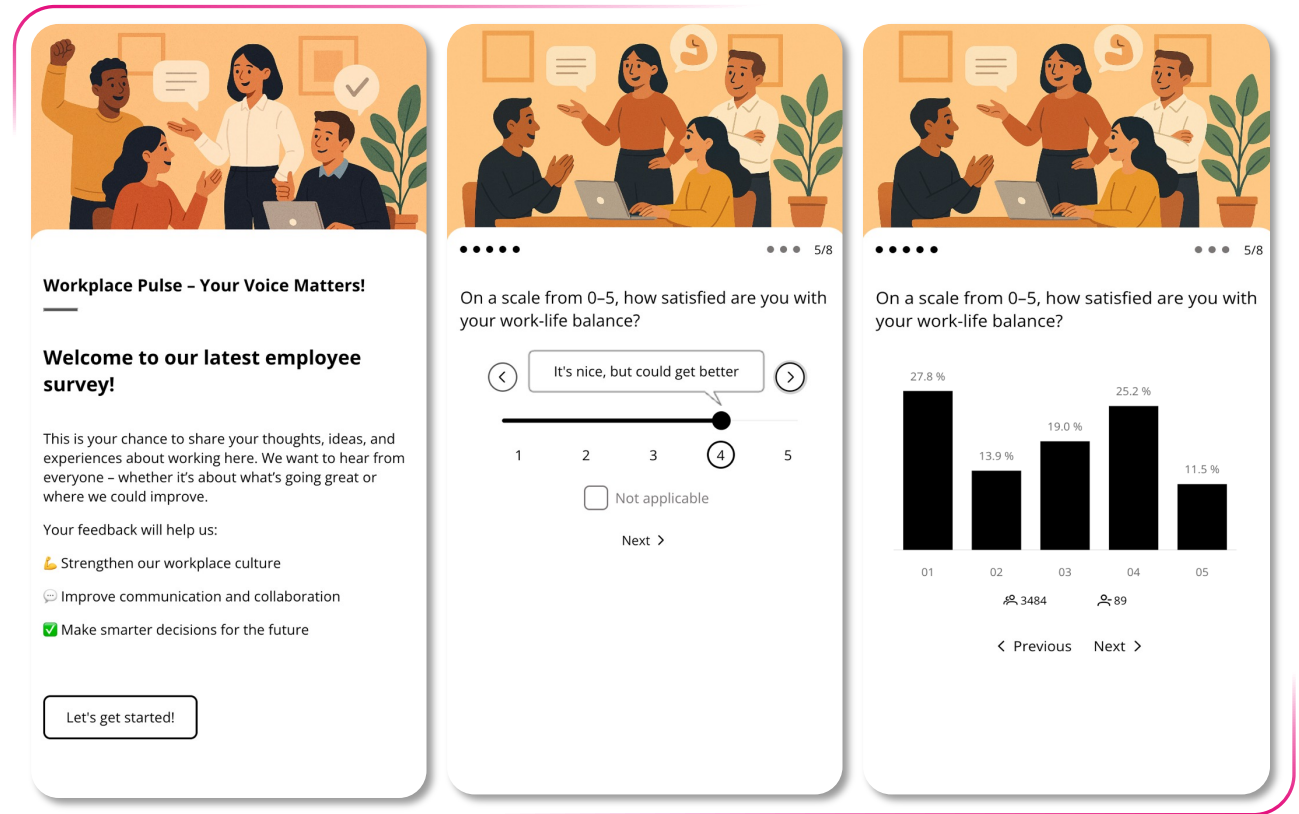

Use Cases

Drive meaningful change with the Survey Plugin! Employee opinions and feedback are essential for growth and improvement. Whether you're conducting large-scale employee surveys or quick pulse checks, the Survey Plugin makes it easy to gather insights, identify trends, and take action.

Empower your organization to make data-driven decisions and create a workplace that truly listens to its people.

Features

- **Eight Question Types:** Flexibility to create surveys that fit your needs, from single choice to free text.
- **Anonymous and One-Time Participation:** Encourage honest feedback with privacy options.
- **Real-Time Results:** Get instant insights at the end of the survey for quick decision-making.
- **CSV Export:** Analyze data in detail with easy-to-use exports for comprehensive evaluation.
- **Survey Templates:** Save time with ready-made templates for quick setup.
- **Survey Paths:** Create dynamic, personalized surveys with branching logic.
- **Scheduled Activation:** Plan surveys with start and end dates to align with campaigns or initiatives.

Release Notes – Poll 3.3 - Overview.

NEW FEATURES

- Advanced export

IMPROVEMENTS

- Update the export for anonymous mode
- Save answers in test mode.

01

New Features.

Advanced export.

With this version, we are introducing an important new feature:

👉 **It is now possible to expand the export of poll results to include information from individual users' profile fields!**

What's new?

In the export area of the plugin, editors can now select individual additional profile fields to be included in an extended export. There is also now always the option to generate an export in anonymous mode, i.e. without generating any personal data.

This allows for more detailed, personalised insights across departments, roles and other employee attributes – and all without changing the existing export process if the function is not used.

Why is this relevant?

This extension:

- ✓ Enables a deeper analysis of poll results by user attribute
- ✓ Provides department- or role-specific insights
- ✓ Integrates seamlessly into existing export processes without complicating the user interface

Settings Start Page Questions Feedback page **Data/Export**

Amount of participations: 0
Amount of completed participations: 0

☐ Live-Updates ?

☒ **Advanced export**

Select the profile fields to be included in the export.

☐ **Select all**

☐ **id** *johnDoe*

☐ **type** *user*

☐ **name** *John Doe*

☐ **avatar**

☐ **groups** *admins*

☐ **phone** *+1-335-486-1336*

☐ **email** *john-doe@nowhere.never*

☐ **custom:location** *Berlin*

☐ **custom:department** *Engineering*

Advanced export.

Special case: Anonymous participation

- Editors can also select which profile fields to include in the export.
- Before participating, users consent to their selected profile fields being saved and used in the export.

This approach guarantees data protection and transparency while providing meaningful evaluations.

The image displays two overlapping mobile application screens. The background screen is the 'Anonymous submission' configuration page, which includes a title bar with a back arrow, a checkmark icon, and the text '#test 3.5'. The main content area has a 'Consent message' section with a text editor containing the text: 'Consent Required. By participating you agree to the collection and processing of your responses for research purposes. If you do not consent, please do not proceed.' Below this is a section titled 'Select the profile fields to be included in the export.' with a list of fields: 'id johnDoe', 'type user', 'name John Doe', 'avatar', 'groups admins', 'phone +1-335-486-1336', 'email john-doe@nowhere.never', 'custom:location Berlin', and 'custom:department Engineering'. Each field has an unchecked checkbox. The foreground screen is a user consent dialog with a pink header bar containing 'Zurück', '#test 3.5', and a settings icon. It displays the same 'Consent Required' message and has two input fields labeled 'Custom.Department' and 'Custom.Location'. At the bottom are 'Accept' and 'Cancel' buttons.

02

Improvements.

Improvements.

We have changed the export structure for anonymous mode.

We have also optimised the export of survey results to make evaluating your data easier. Previously, all answers to a question were summarised on a single line, which made detailed analysis difficult.

From now on, the export will be based on the well-established structure of our survey reports. Each line will represent a set of responses, rather than a question. This allows you to gain valuable insights more quickly while preserving the anonymity of your participants.

Anonymous session ID	Date	1) What do you like best about working for our company?	2) How many hours of overtime	3) Which project should we focus on?	4) What measures would you like to see implemented?	5) How do you feel about the company's future?	6) Please rank the following aspects of our company (1-5)	7) In which department would you like to work?	8) How likely is it that you would recommend us as an employer to a friend?

Answers are stored in test mode.

To make the testing process more reliable, answers in test mode are now stored in the same way as in live mode. This makes it easier to check and evaluate poll content before publication.
