Release Notes – Poll 3.0 - Overview.

IMPROVEMENTS

- More space for longer feedback level texts
- Pause/resume a quiz
- Improvement of the anonymous mode

## FIXES

- No more duplicate answers

01

Improvements.

Improvements.

More space for longer feedback level texts.

Previously, longer texts for the various feedback levels were sometimes "cut off".

We have now added more space to allow longer level descriptions to be displayed in full length on both mobile and desktop devices.

Improvements.

Pause/resume a quiz.

If you do not complete a quiz in one go, the next time you open it you will be taken directly to the point where you left off.

Improvement of the anonymous mode.

In the anonymous mode, no evaluation statistics (feedback level and question overview including correct answers) will be displayed when you visit the quiz again.

Instead, a message will be displayed explaining why no detailed information can be displayed in anonymous mode.

02

Fixes.

Fixes.

No more duplicate answers.

Previously, it was possible to cheat by opening a quiz in multiple tabs or browser windows, which sometimes led to some users allways getting the maximum number of points.

To prevent this, we have now implemented a mechanism that prevents multiple sessions from being open to the same instance.
