Quiz Plugin.

Release Notes Version 3.2

Plugin Quiz.

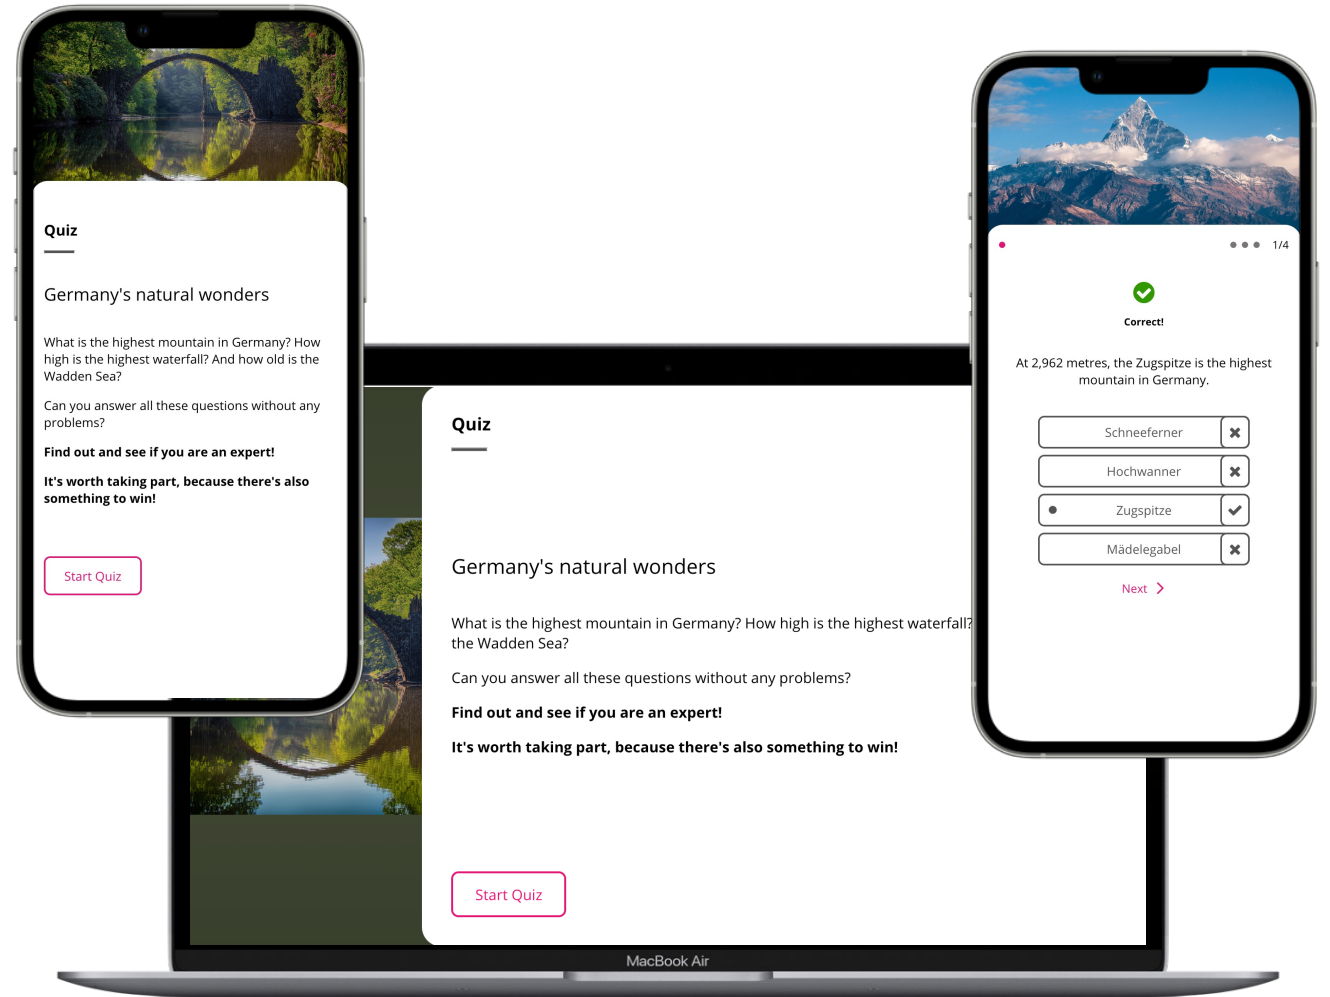

Use case

Motivate your employees to participate and increase their engagement - this is what our quiz plugin can do. Whether as a competition or e-learning format, the quiz is a real magnet for your intranet or employee app.

Features

- Unlimited questions and up to four response options
- Instant, customisable answer feedback
- Ranking for participants at the end of the quiz (optional)
- Optimised for desktop and mobile use
- Anonymous and one-time participation possible
- Export results via CSV for further analysis
- Random mode for questions from a large question set
- Use of templates
- Option for individual planning and activation of the quiz with start and end date

Technologies:  Hailo  Staffbase

Release Notes – Quiz 3.2 - Overview.

NEW FEATURES

- Restrict quiz availability
- More information for editors: The plugin footer

IMPROVEMENTS

- Editing of generic content also possible in live mode

01

NEW FEATURES.

Quiz Restrict availability.

Until now, quizzes could not be published on a time-controlled basis.

With the new release, we have now introduced the option to define a specific start and/or end time to limit the availability of the quiz.

If active, users cannot access the content of the quiz outside the defined times.

Editors also have the option of configuring specific information texts for the new function.

Note: As an editor, you can of course access the content of the quiz at any time in edit or test mode.

Quiz Not Yet Available

The quiz you are trying to access is not yet available. Please check back later to participate. Thank you for your patience.

Available from	<input type="text" value="MM/DD/YYYY HH:MM"/>
Information text for users	<div><p>← → B <i>I</i> <u>U</u> S Paragraph ▾ ≡ ≡ ≡ ≡ <u>A</u> ▾ <i>I</i>x </p><p>Quiz Not Yet Available</p><p>The quiz you are trying to access is not yet available. Please check back later to participate. Thank you for your patience.</p></div>
Available till	<input type="text" value="MM/DD/YYYY HH:MM"/>
Information text for users	<div><p>← → B <i>I</i> <u>U</u> S Paragraph ▾ ≡ ≡ ≡ ≡ <u>A</u> ▾ <i>I</i>x </p><p>Quiz No Longer Available</p><p>The quiz you are trying to access is no longer available. Thank you for your interest and participation.</p></div>

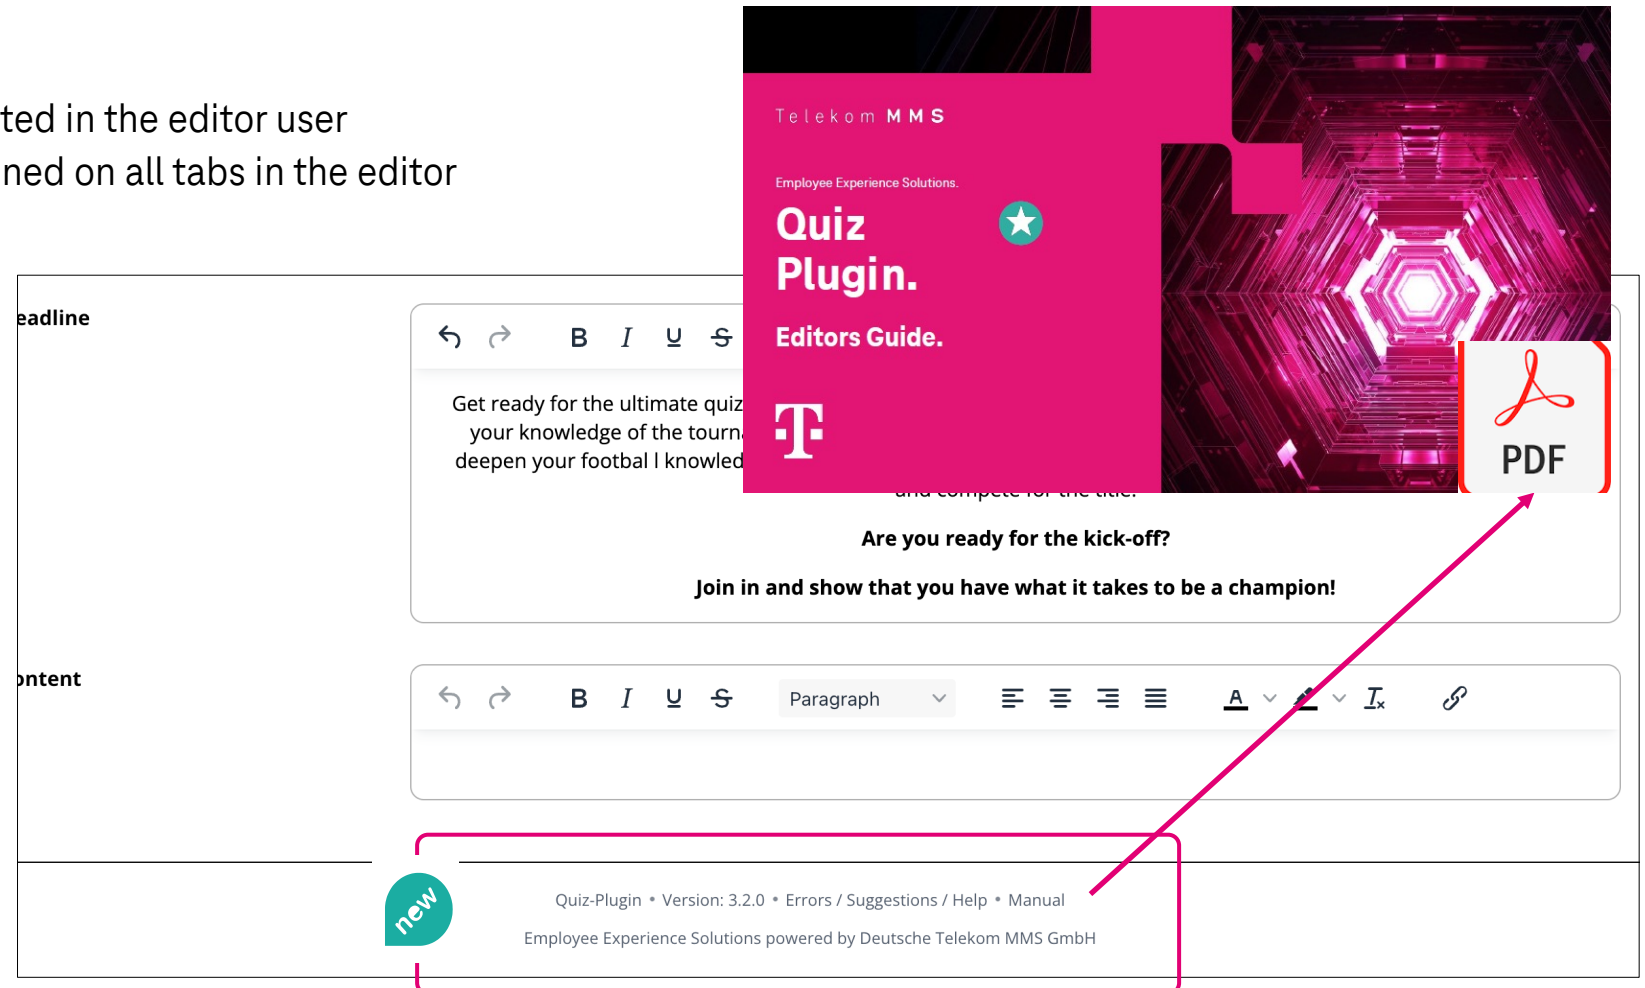

More information for editors.

Plugin Footer.

With this release, a footer will be implemented in the editor user interface. This footer is permanently positioned on all tabs in the editor menu at the bottom of each tab.

With this feature, we give editors more information on how to contact us by email in case of support.

We have also made the relevant manuals for using the quiz plugin available for download centrally.

02

IMPROVEMENTS.

Improvements.

Editing generic content in live mode.

Previously, it was not possible to edit content that had no influence on the outcome or data consistency of a quiz once the quiz had gone live. For example, it was no longer possible to add or change questions. Other content such as the start page could also no longer be edited.

With version 3.2, it is now possible to customize the content of the start, feedback and results pages in live mode.

Questions?

Our team will be happy to help you!
