# Quiz Plugin.

Release Notes Version 3.5

# Plugin Quiz.

## Use Cases

Transform your intranet or employee app into an engagement hub with our powerful quiz plugin! Designed to motivate employees and spark participation, this tool is perfect for competitions, e-learning, and more.

Whether you're boosting engagement or delivering training, our quiz plugin makes it easy, fun, and effective.

## Features

- Unlimited Questions & Customizable Feedback:** Tailor quizzes to your needs and provide instant, personalized feedback for better engagement.
- Participant Ranking (Optional):** Motivate employees with friendly competition through end-of-quiz rankings.
- Time Limit for Questions (Optional):** Add excitement by setting a time limit for answers, encouraging quick thinking and participation.
- Anonymous & One-Time Participation:** Encourage honest feedback and inclusivity with flexible participation options.
- CSV-Export for Results:** Analyze quiz data easily with exportable results for actionable insights.
- Random Mode & Templates:** Keep quizzes dynamic with random question selection and save time with ready-made templates.
- Scheduled Activation:** Plan quizzes with start/end dates to align with campaigns, training, or events.

**Quiz DEMO - Data Privacy Quiz**

How familiar are you with data privacy?

Data protection affects us all - in our day-to-day work and beyond. Test your knowledge and find out if you are a real data privacy pro!

Let's go!

1/5

What is considered *personal data* according to the GDPR?

2

Personnel number  
Company address  
Software licence key  
Product serial number

Confirm

Results      Ranking

Thank you for taking part in the quiz. You'll find a great summary of the topic here: [Link](#).

Question 01: What is considered personal data according to the GDPR?

✓ Personnel number  
Company address  
Software licence key  
Product serial number

Question 02: Which of the following principles are part of data processing under the GDPR?

✓ Transparency  
Rentability  
Accuracy

# Release Notes – Quiz 3.5 - Overview.

## NEW FEATURES

-  Advanced export

## IMPROVEMENTS

-  Update the export for anonymous mode

01

**New Features.**

# Advanced export.

With this version, we are introducing an important new feature:

👉 **It is now possible to expand the export of quiz results to include information from individual users' profile fields!**

## What's new?

In the export area of the plugin, editors can now select individual additional profile fields to be included in an extended export. There is also now always the option to generate an export in anonymous mode, i.e. without generating any personal data.

This allows for more detailed, personalised insights across departments, roles and other employee attributes – and all without changing the existing export process if the function is not used.

## Why is this relevant?

This extension:

- ✓ Enables a deeper analysis of quiz results by user attribute
- ✓ Provides department- or role-specific insights
- ✓ Integrates seamlessly into existing export processes without complicating the user interface

The quiz is currently in normal export mode. You can include sensitive participant information (e.g. names) in the export file, or export the data anonymously to hide participant identities.

Amount of participations: 1  
Amount of completed participations: 1

01 John Doe JD 0 Points ⓘ

**Live-Updates** ⓘ

**Advanced export**  
Select the profile fields to be included in the export.

**Select all**

**id** *johnDoe*

**type** *user*

**name** *John Doe*

**avatar**

**groups** *admins*

**phone** *+1-335-486-1336*

**email** *john-doe@nowhere.never*

**custom:location** *Berlin*

**custom:department** *Engineering*

**custom:cost\_center** *12345*

# Advanced export.

## Special case: Anonymous participation

- Editors can also select which profile fields to include in the export.
- Before participating, users consent to their selected profile fields being saved and used in the export.

This approach guarantees data protection and transparency while providing meaningful evaluations.

Anonymous submission 

Consent message 

**Consent Required**

By participating you agree to the collection and processing of your responses for research purposes. If you do not consent, please do not proceed.

Select the profile fields to be included in the export.

Custom.Location

02

**Improvements.**

# An update to the export for anonymous mode.

## Problem

Exports in anonymous mode were hardly usable for analysis.

- One line per question
- Response values of all participants in one cell, separated by commas
- No clean analysis per user or participation possible.

## Solution

We are introducing a **new export structure** that is based on the non-anonymous mode, but which continues to **be free of personal data**.

- **One line per session** instead of per question.
- Clear, exportable data structure
- Data protection remains fully intact

## Added Value

- ✓ More understandable exports
- ✓ Better processing (e.g. in Excel/BI tools)
- ✓ Supports future improvements in reporting

The screenshot shows the 'Data/Export' settings page. At the top, there are tabs: Settings, Start Page, Questions, Feedback page, Results page, and Data/Export (which is highlighted). Below the tabs are buttons for 'Anonymous export as CSV' (highlighted in pink), 'Delete all datasets' (in a red box), and language options: English, German, and French (France). A message states: 'The quiz is currently in anonymous export mode. Exported data will not include any sensitive participant information.' Below this, it shows 'Amount of participations: 1' and 'Amount of completed participations: 1'. There are two checkboxes: 'Live-Updates' (unchecked) and 'Advanced export' (checked). Under 'Advanced export', there is a sub-section titled 'Select the profile fields to be included in the export.' with five checked options: 'Select all', 'type user', 'groups admins', 'custom:location Berlin', and 'custom:department Engineering'. At the bottom, there is a table with columns A through H, showing three rows of data. The first row has a header: 'Anonymous s custom.local custom.depa type groups Date 1) Test1 1) Score 1) Du'. The data rows are: 1) 1f97a2c3-9b Berlin Engineering user normalUsers 01.06.26 2 0; 2) 869a5fe8-c7 Berlin Engineering user admins 01.06.26 1 1.

	A	B	C	D	E	F	G	H
1	Anonymous s custom.local custom.depa	type	groups	Date	1) Test1	1) Score	1) Du	
2	1f97a2c3-9b Berlin	Engineering	user	normalUsers	01.06.26	2	0	
3	869a5fe8-c7 Berlin	Engineering	user	admins	01.06.26	1	1
